Town of Windsor to Host Groundbreaking for Eastman Park River Experience Phase II Project

WINDSOR, Colo.— Windsor Parks, Recreation & Culture is inviting the public to attend the Eastman Park River Experience Phase II project groundbreaking, located at Eastman Park South off of Laku Lake Rd., from 12:30 p.m. to 1 p.m. on Wednesday, Dec. 13.

As one of 15 key project participants, Windsor is partnering with the Northern Integrated Supply Project (NISP) to dedicate 9 acres of land for wetland mitigation. This collaboration aims to enhance the overall environmental quality and recreational features for the benefit of the community. As part of this dedication, a portion of Eastman Park South will be preserved as wetland.

Phase II also includes an additional parking lot, shelters, trail expansion, the installation of new Cache La Poudre River access points including ones with Americans with Disabilities Act (ADA) accessibility, a nature-themed playground, a hill slide, landscaping and irrigation.

“We are thrilled to break ground this upcoming month on this highly anticipated project,” said Open Space & Trails Manager Wade Willis. “Our collaboration with NISP has played a pivotal role in enhancing the environment, wetlands and recreational features for the enjoyment of all.”

The completion of this project is anticipated in spring 2024.
